| Background Opportunity Objectives Success metrics Remarks The background and opportunities are sufficient. You could include more new opportunities for Seats & More and improve the background story. The Business Objectives and Succes Metrics are very brief. The motivation for the selection of the objectives and metrics should be added and some explanation. From the book you can learn the distinction between the two parts and use that in your document. I limitations Context diagram Feature tree Meaningful and realistic Remarks The feature tree is good, however it contains too many features. Focus on 1-2 features and go in depth, elaborate on all the functions that they entail. This will give the client a better view of the possibilities of the system you wil implement. You initial release will be more focused than and everything else will be subsequent/excluded. Motivate you choices. Use the interview to get more in to detail with the client about 1-2 features. | | ion and Scope Document | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
